

David Jacobsen SOCIALIST LABOUR

for LEITH WALK

European Union: 'I am committed to an immediate and complete withdrawal of Britain from the European Union. Only by getting out of the EU can Britain exert full control of its economy, sovereignty and political powers'

Health: 'I campaign as a Socialist in the Socialist Labour Party to regain ownership and control of our NHS from the clutches of private sector asset strippers ushered in by a centralised SNP led Scottish government'

Housing: 'As we are home to the second largest population density in the UK, I want to see rent security restored for struggling families. I would exert pressure on the Council to begin a house building programme in the most economically run down areas of Leith and Edinburgh. I say No to 3, 5 or 10 year plans. The Scottish Government must return financial and political control of Housing to the local Council'

Transport: 'I want to see Lothian Buses returned to Corporation ownership and control. Until the Tram Inquiry Team Report is published, and we know what happened in the Carillion case, the Tram extension project should be suspended'
